Part of the Lorfords Contemporary made-to-order collection. The Bayswater Armchair design has been gracing drawing rooms for nearly 150 years.

This elegantly proportioned design classic was made by Howard & Sons and named the 'Bridgewater'. Built and finished just as the model was in the 19th Century, with hand-tied coil springs and hand-sewn down-filled sac-a-duvet cushions.

Compact yet supremely comfortable, the Bayswater is perfectly at home gracing a drawing room yet equally at home nestling in the corner of a cottage bedroom.

Lorfords Contemporary is based in the Cotswolds and creates luxury bespoke furniture using traditional upholstery. For more information or to view the whole collection please visit lorfords.com.
