Beautiful mid 19th Century Swedish pine table, circa 1940.

The thin oval tilt-top is supported over a simple central support column with turned details.

It terminates in a triform base of very elegant splayed legs.

The pine has faded with age to a lovely mellow colour and the base retains traces of old white paint.

This delightful and versatile table might be used for a lamp, a vase of flowers, as a card table... the options are endless!

In its totally original and sound condition, this will be a charming addition to any interior.
