African Swahili Carved Daybed

£2,850.00

W: 234 cm (92 1/8")
H: 173 cm (68 1/8")
D: 80 cm (31 1/2")

Impressive oversized daybed originating from the East African Swahili coast.

This unusual daybed is constructed of geometrically carved panels and oversized legs, that are held together by strips of animal hide, bound, and woven to form the bed base or seat.

Traditionally it probably would have been situated on a large covered veranda taking advantage of the cooling breeze from the Indian Ocean.

A fantastic piece that withholds immense decorative power.
